

**Checklist of the Vascular Plants of Sedgwick Reserve
Santa Barbara County, California**

*M. P. Williams, W. Ferren, J. Hamilton, L. Ballard, et al.
Revised April 2024*

This checklist of vascular plants includes taxa observed or collected at Sedgwick Reserve, a natural reserve owned by the University of California and managed by the UC Natural Reserve System out of the local NRS office at the University of California, Santa Barbara.

Specimen voucher numbers are available by request for those specimens confirmed by local authorities and documented with collections that are deposited at the UCSB Herbarium. Taxa reported from casual field observations but not documented by specimens are designated "no collection." Plants not native to California are indicated by an asterisk (*).

This checklist will be updated as necessary. Please provide comments and additions. We request that voucher specimens, with labels or label data, for all additional taxa be deposited at the Sedgwick Reserve Herbarium and a duplicate filed at the UCSB Herbarium.
